

TRUST CIVIL ENGINEERS LTD

"Safe Design and Construction Heart of Serviceability"

Company Overview

Founded in **July 2020**, **TRUST CIVIL ENGINEERS LTD** is a Rwandan-based engineering firm located in **Kigali City, Nyarugenge District**. Our company was established on the principle that *safe design and construction* are not just technical tasks, but the foundation of long-term serviceability, sustainability, and trust in the built environment.

We provide **innovative and reliable civil engineering services** covering the full project lifecycle from concept to completion ensuring that our clients receive high-quality, efficient, and safe outcomes.

Our Mission

To provide **innovative, safe, and sustainable engineering solutions** that contribute to the growth of modern infrastructure and improve the lives of communities.

Our Vision

To be a **leading engineering firm in Africa**, recognized for our excellence in design, construction, and project management, while upholding the highest standards of safety, quality, and client satisfaction.

Our Goals & Objectives

- To **deliver high-quality engineering services** with integrity and professionalism.
- To **promote safe design practices** that enhance the serviceability and sustainability of structures.
- Utilize **advanced technologies** such as **BIM (Building Information Modeling)** for precision and efficiency.
- To **expand our footprint** in regional and international markets through consistent excellence.

- To **train and empower local talent** through capacity building and software training programs.
 - Promote **sustainable and green building** practices in construction.
 - Provide **expert consultancy and training** in construction software and best practices.
 - Ensure **timely project delivery** with strict adherence to quality and safety standards.
-

Our Core Services (Main Fields)

1. **Architectural Design**
 - Creative, functional, and sustainable architectural solutions tailored to client needs.
 2. **Structural Design**
 - Expert analysis and design of a wide variety of structures, including **complex-shaped and high-rise structures**, bridges and special structures ensuring safety, durability, and code compliance.
 - Expertise in **seismic-resistant and high-performance structures**
 - Use of modern software for **optimized and safe structural solutions**
 3. **Consultancy Works**
 - Professional consulting services for planning, feasibility studies, cost estimation, structural assessment, and value engineering.
 4. **Construction Implementation**
 - Execution of construction projects with precision, safety, and quality control, from groundwork to finishing.
 5. **Project Management**
 - Comprehensive project management services including scheduling, budgeting, procurement, and quality assurance to ensure timely and successful project delivery.
-

Specialized Sub-Fields

- **MEP Works (Mechanical, Electrical & Plumbing)**
Integrated MEP design and supervision services to ensure efficient building systems
 - Energy-efficient HVAC, electrical, and plumbing systems.
 - **BIM (Building Information Modeling)**
Advanced BIM workflows for design coordination, clash detection, quantity takeoffs, and construction planning.
 - Enhanced collaboration among architects, engineers, and contractors.
 - **Green Building Design & Construction**
 - Eco-friendly materials and energy-efficient designs.
 - LEED and other sustainability certification support.
 - **Construction Software Training**
Professional training services on essential industry software tools such as AutoCAD, Revit, ETABS, Autodesk robot, SAP200, ArchiCAD, MS project and Primavera-
building the next generation of skilled engineers.
-

Why Choose Us?

- **Client-Centric Approach**
We tailor our solutions to meet client objectives while ensuring regulatory and safety compliance.
 - **Experienced Team**
Our engineers, designers, and project managers bring years of experience and innovation to every project.
 - **Commitment to Quality and Safety**
Every design and implementation phase adheres to national and international safety standards.
 - **Technology-Driven**
We integrate the latest tools and methodologies for efficient design, planning, and construction.
